

PROCESS SOLUTIONS Z Conveyors

"Our Z conveyor works great for shredded paper"

"We use our 300Z as a space saver. It fits under our bi-directional shredder discharge conveyor (also an EVI conveyor) and elevates product from floor level to fill a gaylord box."

- Chris M., Friedland Industries, Lansing, Michigan

Why use a Z Conveyor from EVI?

This design offers a **lower** horizontal section for **convenient loading** and **easy transition from process equipment**. Lower horizontals are available in standard lengths as well as custom lengths per YOUR specification.

The Z conveyor also offers an **upper** horizontal section that allows parts and materials to be **discharged into the center of the receiving entity** such as a **gaylord box, conveyor, shredder, baler, etc.** Standard and custom lengths available.

The Z conveyor line is a **cost effective** and **space efficient** way to elevate your products and materials.

Features and Benefits of the Z Conveyor

- One **continuous** belt handles materials, scrap and parts gently and effectively
- Makes efficient use of production and processing space
- Reduces transition points to **prevent spillage and reduce dust**
- **Customizable** – numerous widths and configurations available

"The 600Z was the most affordable and effective solution that would fit our space restrictions."

"We use our 600Z to convey wood chips from our shredder to our outdoor truck loading system."

- Reed B., Panel Processing, Coldwater, Michigan
