Endura-Veyor, Inc. provides custom parcel infeed solutions that set you up for maximum efficiency at the very start of your operation. Our team of specialists is dedicated to creating a user-friendly, agile, ergonomic process to unload and transport inbound parcels, packages, and goods. Our equipment and versatile systems initiate singulation, control product flow, reduce labor dependency, and accelerate productivity.

### **Parcel Unloader**

Automated metering establishes product flow control and initiates singulation.

### **Basic Infeed**

A reliable staple to simplify parcel unloading in any application through automation.

### **Pre-Singulation**

Pre-singulate package and parcel loads for all downstream processes.

### **Package Returns**

Increase throughput and processing capacity in fast-paced operations.

### **Multi-Line Sortation**

Assign incoming parcels and packages to multiple lines with ease.

### **Empty Box Removal**

Automate removal, transportation, and compaction of empty boxes to mitigate OCC crowding and accumulation.

Our line of parcel infeed solutions is continuously growing to meet the ever-changing needs of the parcel industry. We developed a Game-Changing Parcel Unloader that outperforms standard hydraulic unloaders in virtually every category. Get in touch with our Parcel Team to learn more!
